

## Amazing Benefits

Inflating and maintaining your tires with nitrogen can provide amazing benefits. Tires inflated with high purity nitrogen can last up to 50% longer\* than those inflated with regular air. Vehicles riding on nitrogen inflated tires can enjoy fuel economy increases of up to 10%\* and a reduction in the likelihood of a tire failure of up to 75%\*...all while reducing your carbon footprint.

Nothing you can do or buy for your vehicle will have as profound an impact on your pocketbook or our environment for such a reasonable cost.

Your nitrogen conversion may also entitle you to a membership in the Go Green Auto Club. This FREE membership is an expression of the confidence we have in our tire inflation program and a gift from your Go Green dealer for doing your part to keep your vehicle properly maintained, conserve fuel and help restore our embattled planet.

Your Go Green Auto Club membership includes FREE nitrogen top-offs, inflation service reminders and may include:†

**Free Tire Repair & Replacement  
Road Hazard Protection**
